

# Building Services collaborate Work space areas

Antac's Northern Building Services Division has recently completed a £100K refurbishment project at one of EE's flagship buildings - the Call Centre in Sovereign Place, Leeds. EE, now part of the BT Group, authorised Antac via BT Facility Services to progress the refurbishment, after an initial 4-way tender, to be completed within only a 6 week period. The newly designed 'Collaboration Work Space Area' was fully applauded by the appointed architect, client end user and BT / EE FM project management teams after seeing it in its finished splendour.

The works included:-

- Installation of 5 different carpets specially designed to create curved walkways, multiple circular shapes, new branding & graphics, partitionary and manifestations on glass.
- Circular suspended ceiling features hanging from structured soffit through existing ceiling fitted with LED spotlights.
- Semi circular, slatted screen which appears to be coloured EE branded turquoise from one side and EE branded yellow from the opposite side complete with semi circular laminated counter (see picture).

Our building services teams nationwide have considerable experience in refurbishment project works within the Ministry of Justice, Ministry of Defence, NHS hospitals, education, telecoms sector, retail, financial institutions and large blue chip companies in the private sector. Antac's possess the technical expertise and knowledge to deliver a quality works programme through their own Quantity Surveyors and Project Managers ensuring that our projects are delivered on time and within budget to the satisfaction of all our customers.
